

Do you live and breathe robotics? Are you a "hands-on" person who loves to create new exciting things?

**Then it's time you meet us!**

We are Bildzi! A funded startup in stealth mode, with a very strong team, and we're looking to hire a **VP R&D** and a **HARDWARE R&D TEAM MEMBER**.

These roles take place between the worlds of construction and robotics and will expose you to cutting edge technologies in robotics, mechanical engineering and material theory.

### **Job Responsibilities:**

- Leading the R&D team throughout the development process.
- Designing the final product.
- Developing robots for construction work.
- Designing algorithms to enhance task efficiency.

### **Job Requirements:**

- BSc in Mechanical Engineering \ Aerospace Engineering \ Computer Science \ Electrical Engineering from a known University (preferably doctorate or other staff members).
- More than 3 years of hands-on autonomous systems development experience.
- Strong algorithm design skills.
- Strong team player.
- Suitable for graduate students.

**Eligible applicants will be given the option to join the co-founders core team.**

So if you think you could be a good fit for our team, and want to join the next unicorn, HOLLA at us.
